KEMIJSKI INŠTITUT

Vabilo na predavanje / Invitation to the Lecture

Synchrotron SOLARIS – the new light source in Poland

Dr. Jacek Szade

SOLARIS National Centre for Synchrotron Radiation, Kraków, Poland
A Chełkowski Institute of Physics, University of Silesia, Chorzów, Poland

Četrtek / Thursday, 5. 9. 2019, ob / at 9.00

Velika predavalnica Kemijskega inštituta /
Great Lecture Hall, National Institute of Chemistry
Hajdrihova 19, Ljubljana, Slovenia

The Polish synchrotron is the first research infrastructure of such substantial size and potential constructed in this part of Europe. The presentation is focused on the status and future research possibilities available at SOLARIS. The parameters of three existing beamlines and five others being under construction will be presented. The plans for future development will be shortly shown.

The beamtime is split into two 6-months allocation periods corresponding to spring and autumn calls for proposals. SOLARIS is the young facility which is open for co-operation in development of its infrastructure.

Vljudno vabljeni / Kindly invited
