Prof. Dr. Silvia Bordiga

Silvia Bordiga is Full Professor in Physical Chemistry at the Department of Chemistry of the University of Turin. From 2012 to 2020 she was Prof. II at the Department of Chemistry of the University of Oslo.

She received many awards: 2017- Prize from the French Chemical Society (bilateral prize France – Italy); 2019- Francois Gault Lectureship Award from EFCATS; 2018-2019- Chemistry European Fellow; 2019- Wilhelm Manchot Research Professorship of the Dep. of Chemistry at the TUM University, Germany; 2021- Premio Antonio Feltrinelli dall' Accademia dei Lincei, 2023- Paolo Chini award. She became member of Lincei Accademy in 2023 and of Accademia delle Scienze in 2024.

Her scientific activity is mainly devoted to the characterization of the physical–chemical properties of high surface area nanostructured materials used as heterogeneous catalysts, materials for adsorption, separation and storage, through in situ spectroscopic studies. H index 126
