.

Dr. Bakhtiyor Rasulev is a Professor at Department of Coatings and Polymeric Materials (North Dakota State University). Previously he was working at Interdisciplinary Center for Nanotoxicity (Jackson, MS USA), directed by Prof. Jerzy Leszczynski. Dr. Rasulev's research covers a range of topics in structure-activity relationship studies dealing with biological activity prediction, physico-chemical and toxicity of various organic compounds, polymers and nanoparticles, including metal oxide nanoparticles and carbon nanomaterials. For this purpose he applies cheminformatics approaches, as well as quantum chemistry, protein-ligand docking and data mining methods.

Dr. Rasulev has more than 70 publications, including publication in such top journals as Nature Nanotechnology, Nanoscale, Chemistry of Materials, Nanotoxicology, etc. He is an Editor-in-Chief of Journal of Nanotoxicology and Nanomedicine (IGI Global, USA) and a permanent reviewer at 25 well-known scientific journals that cover chemical, biological and nanoscience topics.
