Matteo Maestri is Associate Professor of Chemical Engineering at the Politecnico di Milano, Italy. He received the Ph.D. summa cum laude in Chemical Engineering at the Politecnico di Milano in 2008. He has been visiting scholar at the Center for Catalytic Science and Technology-Department of Chemical Engineering of the University of Delaware, USA (2006-2007), Alexander von Humboldt Fellow and at the Fritz-Haber-Institut der Max-Planck-Gesellschaft in Berlin, Germany (2009-2010) and at the Department of Chemistry of the Technische Universität München, Germany (2011).

His main research interests are fundamental analysis of catalytic kinetics and multiscale modeling of catalytic processes. He has been the recipient of several awards at international conferences and in 2017 he has been included in the list of Italy's 100 best "*under 40*" researchers working both in Italy and abroad, by CARTADITALIA - Istituto Italiano di Cultura, Brussels. In 2015, he has been awarded the ERC Starting Grant (SHAPE-677423).
