Prof. Dr. Frank Noé holds a Bachelor in Electrical Engineering (BA Stuttgart) and a Master in Computer Science (Cork Institute of Technology, Ireland). After a brief detour in an AI startup in Frankfurt am Main, he pursued a PhD in Computational Molecular Physics at University of Heidelberg (Dissertation 2006). In 2007, Frank came to Freie Universität Berlin as an independent group leader in the research center MATHEON, he was promoted to tenured Professor in 2013.

Frank's main appoinment is in Mathematics and Computer Science at FU Berlin, and he holds appointment in Physics (FU Berlin) and an adjunct professorship in Chemistry at Rice University, Houston, Texas. In the recent years, Frank's work focuses on the interface of Machine Learning and the Physical Sciences.

Frank has received the **ERC starting grant (2012),** the **ERC consolidator grant (2018),** and the early-career award in theoretical Chemistry from the American Chemical Society (2019). Since 2019 he is ISI Highly Cited Researcher.
