Prof. Dr. Moniek Tromp is a Member of the European Academy of Sciences, Fellow and board member of the Young Academy Europe, Board member of the Dutch Funding Agency (NWO), Board member of the LNVH (Network Dutch Female Professors), Chair of the Dutch Catalysis Society, Member of the Science Strategy Board of LEAPS, Chair and member of international Scientific Advisory boards, member ARC CBBC.

She received her doctoral degree with highest distinction in 2004 (homogeneous catalysis and time-resolved X-ray absorption spectroscopy), from Utrecht University, The Netherlands. After working in the UK (postdoc at University of Southhampton) and Germany (professor in catalysts characterization at Technical University Munich), she is full professor of Materials Chemistry at the University of Groningen, The Netherlands since 2018.

Prof. Tromp's current research fields include spectroscopy, energy materials (energy storage and conversion), catalysis and electrochemistry (batteries and fuel cells), conservation of arts. (> 100 publications, H-index 39.

NWO Athena Award, The Netherlands 2017.
2nd place Amsterdam Innovation Award, The Netherlands 2017
VIVA400, one of the most inspirational Dutch women of 2015.
NWO VIDI award, The Netherland, 2015.
EPSRC Advanced Research Fellowship, UK 2007.
