Prof. Dr. Nevenka Rajić: Academic Profile

Prof. Nevenka Rajić is a Professor at the Faculty of Ecology and Environmental Protection, Union University Nikola Tesla, Belgrade, since 2023. Her primary fields are Inorganic, Materials, and Environmental Chemistry.

She worked at the University of Belgrade's Faculty of Technology and Metallurgy to 2023, advancing from Teaching Assistant to Full Professor. Her education includes a PhD in Chemistry from the University of Ljubljana, and MSc and BSc degrees from the University of Belgrade.

Prof. Rajić's research centers on the design and application of inorganic porous materials (zeolites, aluminosilicates) for environmental protection via adsorption and catalysis.

She has authored or co-authored over 130 SCI-listed papers, cited more than 2800 times (h-index 28), and is included in the Stanford Top 2% Scientist list (since 2019). She has led numerous research projects, including roles in Horizon 2020 and Eureka initiatives. She is a founding member and former President of the Serbian Zeolite Association.
