Prof. Dr. Magda Titirici

Prof. Magda Titirici has a PhD from University of Dortmund and a Habilitation from the Max-Planck Institute of Colloids and Interfaces/University of Potsdam. She moved to the UK in 2013 to take up a "Reader" position at Queen Mary University of London to be promoted to full professor one year later. Prof. Magda Titirici moved to Imperial College in 2019 as a Chair in Sustainable Energy Materials. She also holds short visiting research positions in Japan, Sweden and Romania.

Prof. Magda's Titirici research is on sustainable materials and their implementation in batteries beyond Li ion as well as in electrocatalytic processes including biomass oxidation and O_2/N_2/CO_2 reduction.

She has been included on the list of highly cited researchers since 2018. Her research was awarded by Royal Society of Chemistry, Royal Society, Institute of Materials and Mines, Chinese Academy of Science and others.
