Prof. Dr. Angelika Brückner obtained her PhD and habilitation in chemistry from Humboldt University of Berlin. After having worked in Berlin since 1985 at the Central Institute of Inorganic Chemistry, the Centre of Inorganic Polymers and the Institute for Applied Chemistry, she moved to Rostock in 2009 where she is now professor for spectroscopy and catalysis at the University of Rostock, member of the board and head of the research department "Catalytic In Situ Studies" at the Leibniz Institute for Catalysis. Moreover, she works in several advisory boards, among them Chem Catalysis and the International Congress on Operando Spectroscopy. She is editor of "Catalysis Communications", member of the Foundation Council of the German Synchrotron DESY (until Dec. 2022) and member of the board of the Society of German Chemists (GDCH).
