CV (Prof. Dr Jörg Feldmann, FRSE, FRSC):

Jörg has been educated in Germany at University of Essen with Master thesis in Geochemistry (South Africa) and PhD in Environmental Analytical Chemistry after working in chemical industry and at government authority. Then he received a Fellowship from the Alexander von Humboldt Foundation to do his postdoctoral work at UBC and Uni Alberta in Canada before moving to Scotland (University of Aberdeen) for his first academic position as environmental chemists. He founded his TESLA institute in 2000 and published over 300 publications (h-index 69) mainly in developing novel approaches for elemental speciation analysis. Under his leadership more than 40 PhD students graduated successfully. Recently his TESLA group moved to University of Graz, where he took the chair in Analytical Chemistry. He has been awarded some significant prizes (e.g., 2015 European Plasmaspectrochemistry Award, 2016 Royal Society of Chemistry Interdisciplinary Award, elected to the Scottish Academy of Science (Royal Society of Edinburgh) in 2018).
