

Research opportunities for Ukrainian researchers

Kemijski inštitut (National Institute of Chemistry) is one of Slovenia's leading public research institutions with a 75-year tradition. The Institute's research covers a wide range of disciplines and expertise in chemistry, chemical technology, pharmacy, physics, mathematics, biochemistry, biotechnology, synthetic biology, biology, microbiology, molecular biology and materials research.

WHAT WE OFFER

- Hosting up to 10 Ukrainian researchers in the form of visiting fellows, initially for a period of 6 months. We specifically aim to help especially early career researchers or PhD students.
- Participation of the visiting researchers in scientific research in the above mentioned areas.
- Compensation for the time of the visit in the form of per diem until integration into ongoing projects at the Institute. We also cover the cost of temporary accommodation.
