2010 PHASE I
2015 PHASE II
2023 PHASE III

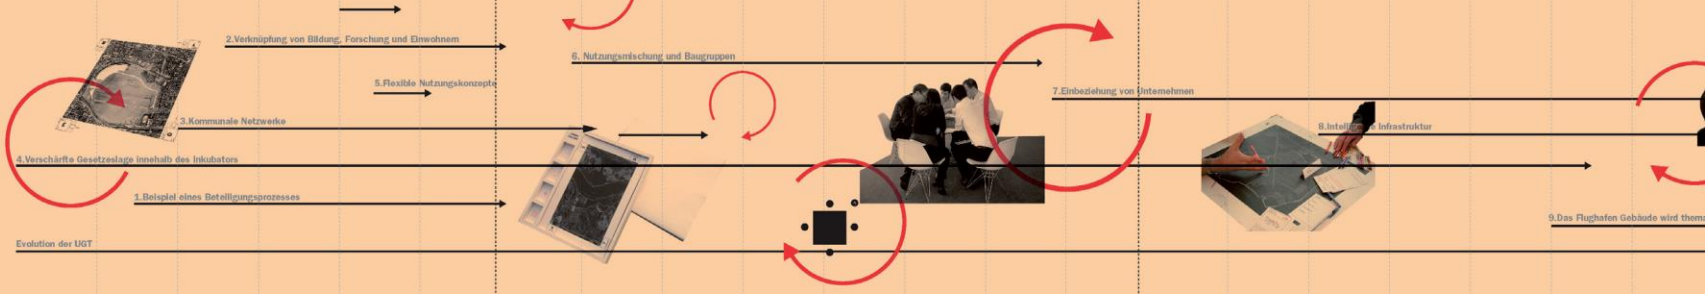

ACTIONPLAN

Das Diagram zeigt mögliche Programme und Projekte. Es zeigt auch die Wachstumsdynamik, welche sich aus dem Zusammenspiel der anderen 3 Ebenen ergeben kann.

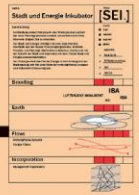

SCENARIO

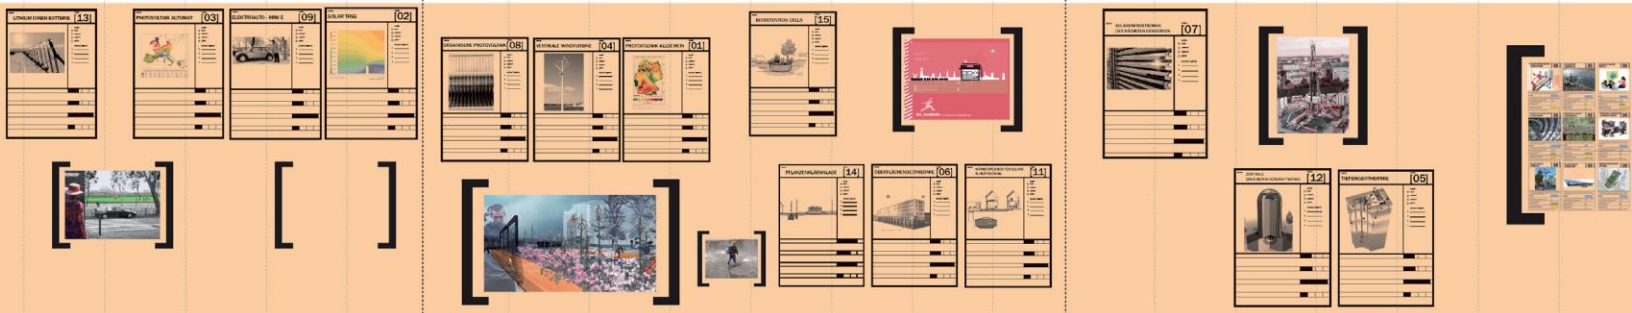

Das Diagram zeigt eine Übersicht der beispielhaften Szenarien welche in der jeweiligen Phase beschreiben sind.

PROTOTYPE

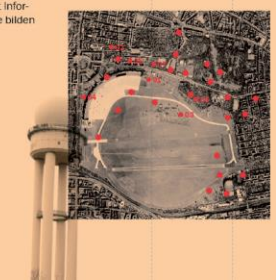

Das Diagram zeigt eine mögliche Bandbreite von Pilotprojekten sowie Technologien, welche zu bestimmter Zeit eingesetzt werden können.

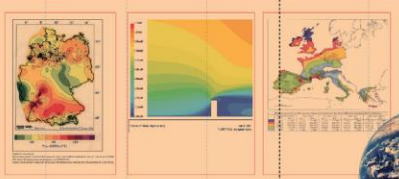

DATABASE

Das Diagram zeigt beispielhaft Informationen welche die Database bilden werden.

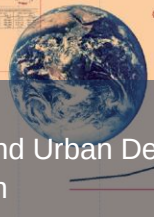

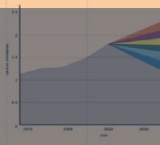

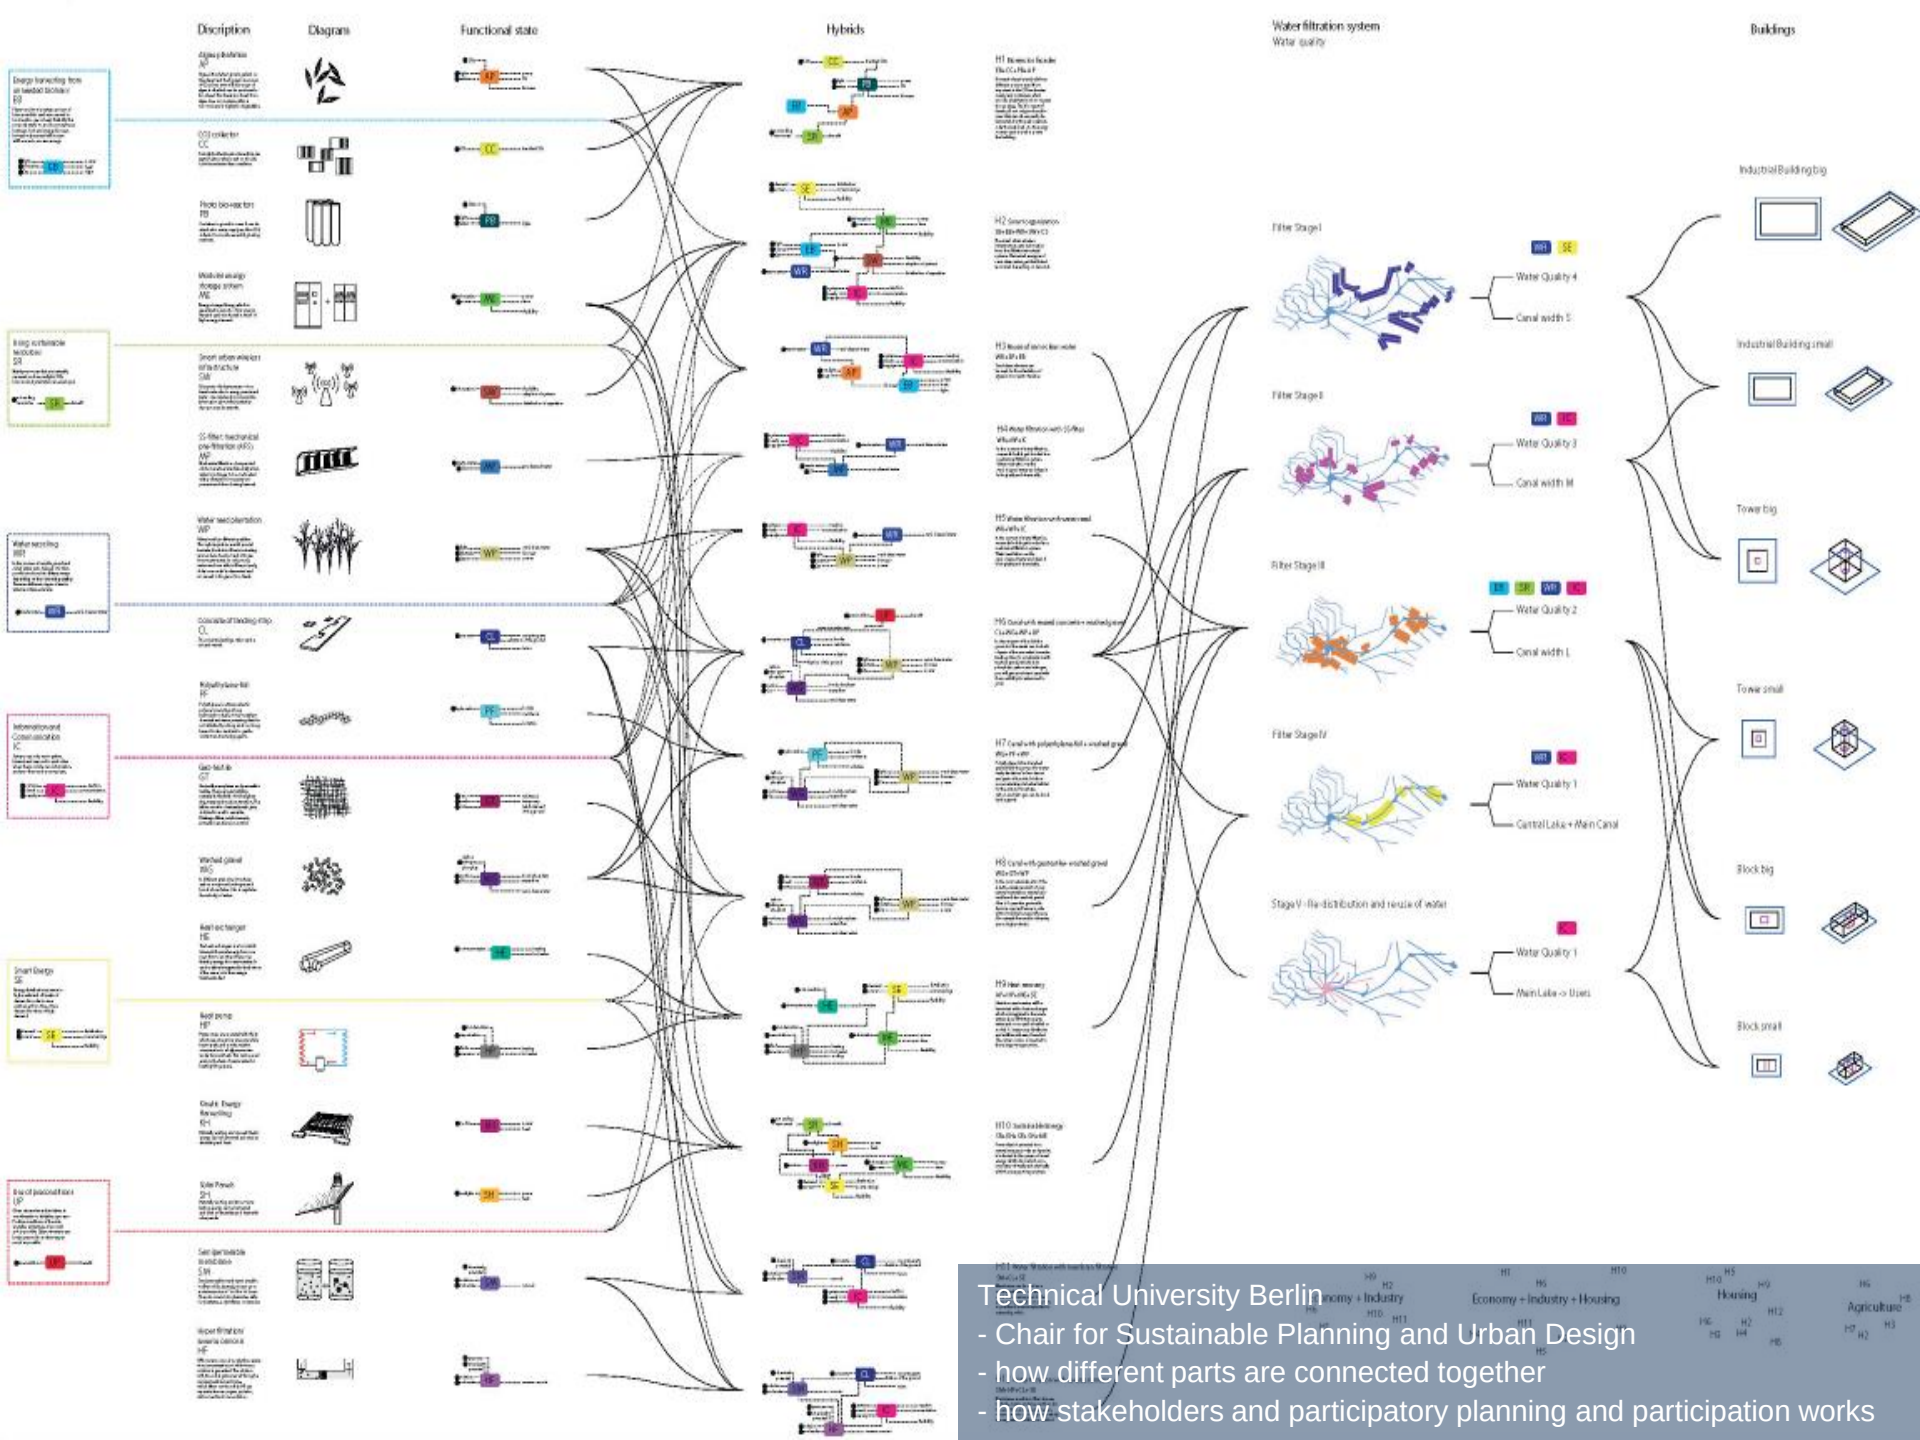

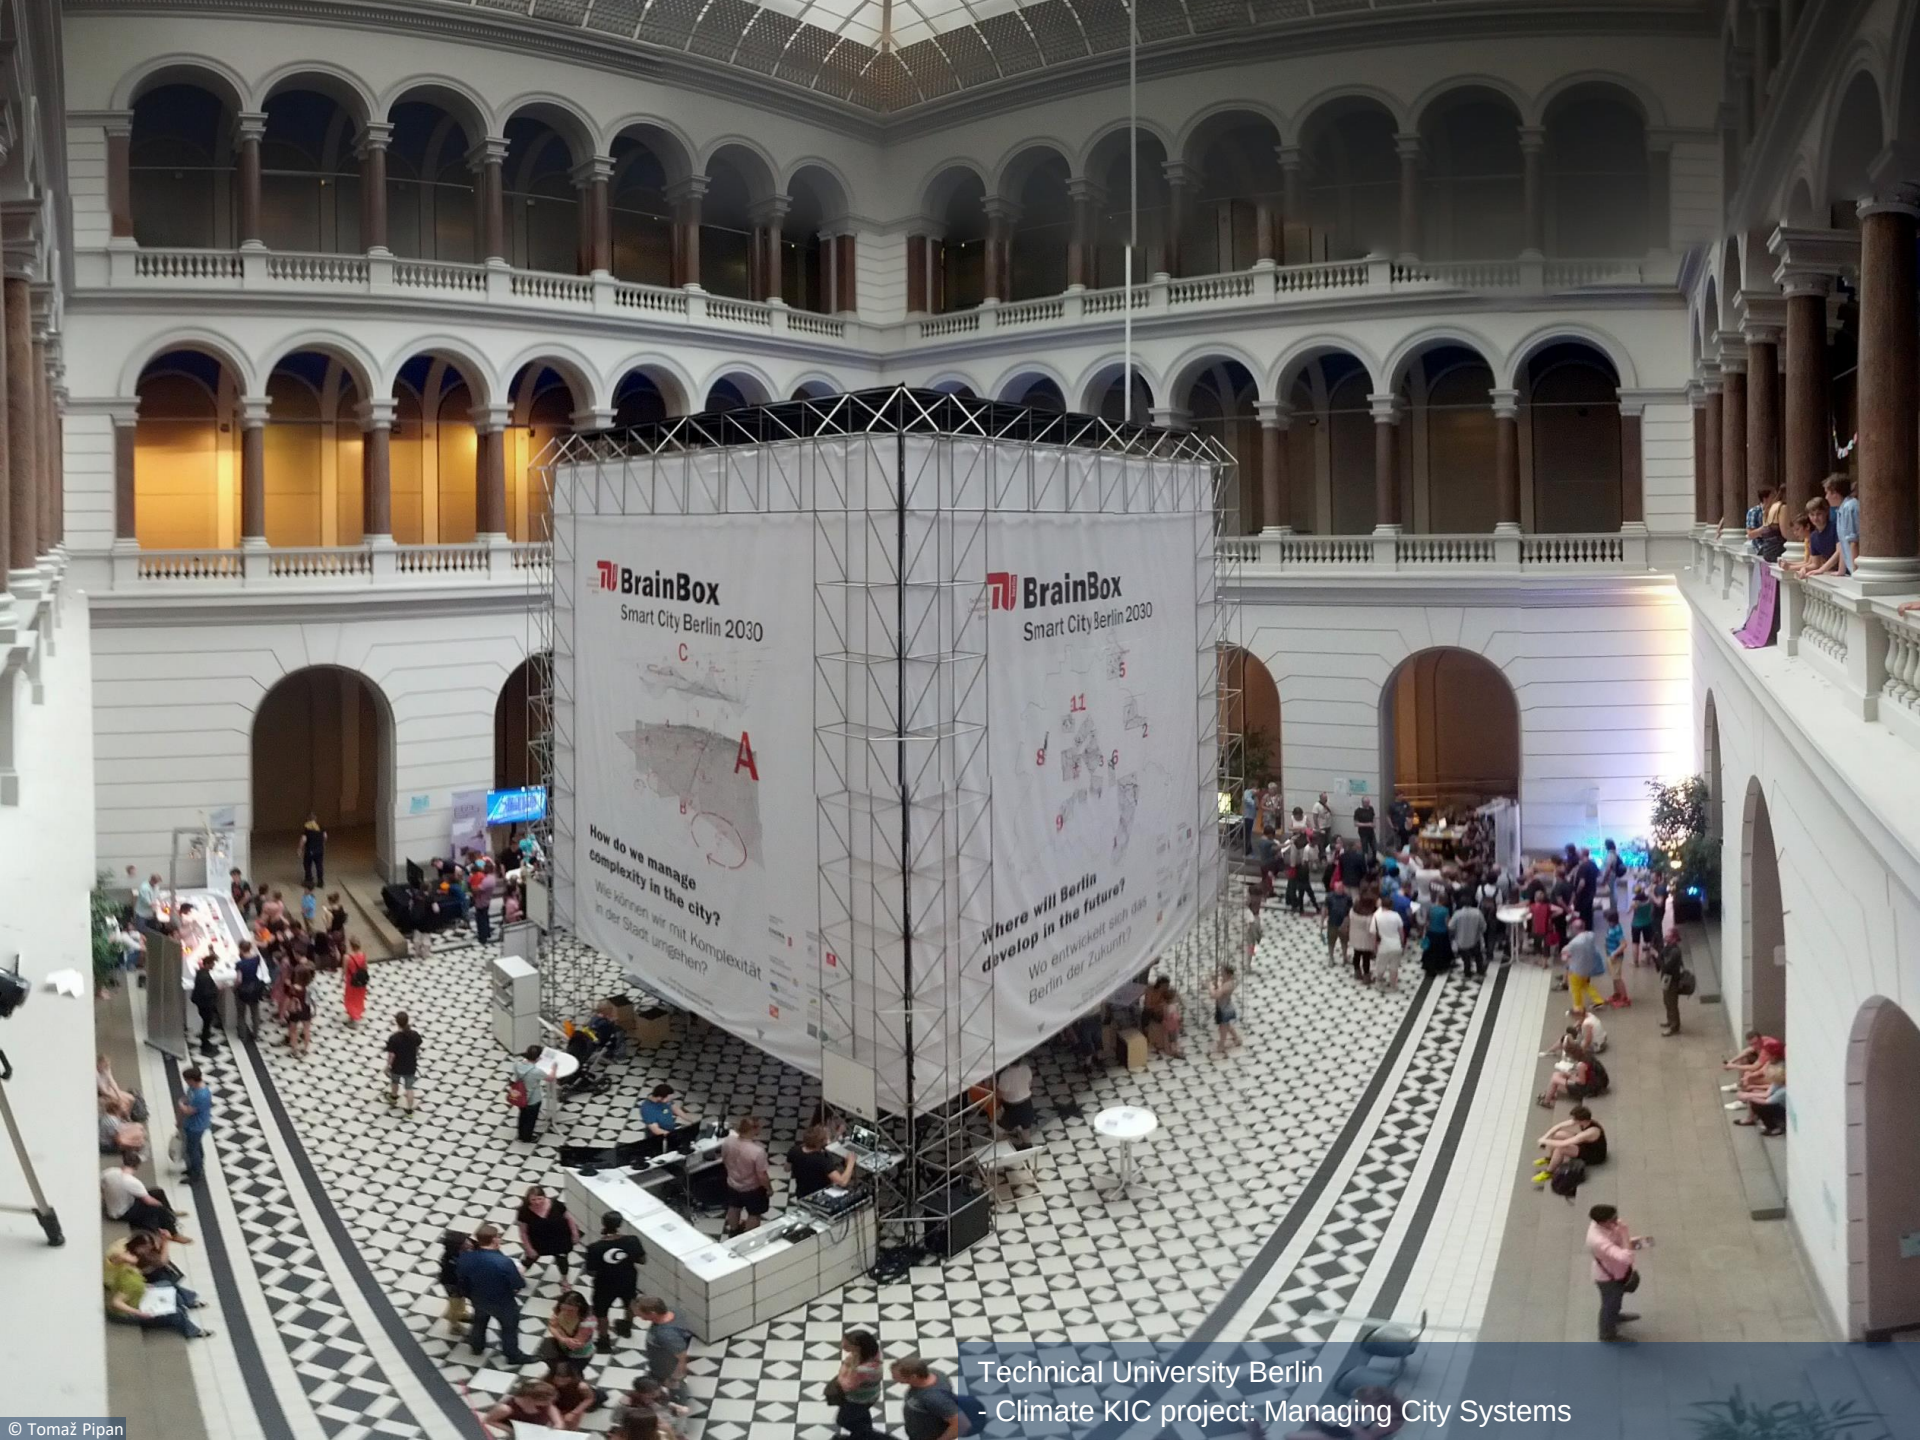

Technical University Berlin
- Chair for Sustainable Planning and Urban Design
- urban design and systems design

Technical University Berlin
- Chair for Sustainable Planning and Urban Design
- how different parts are connected together
- how stakeholders and participatory planning and participation works

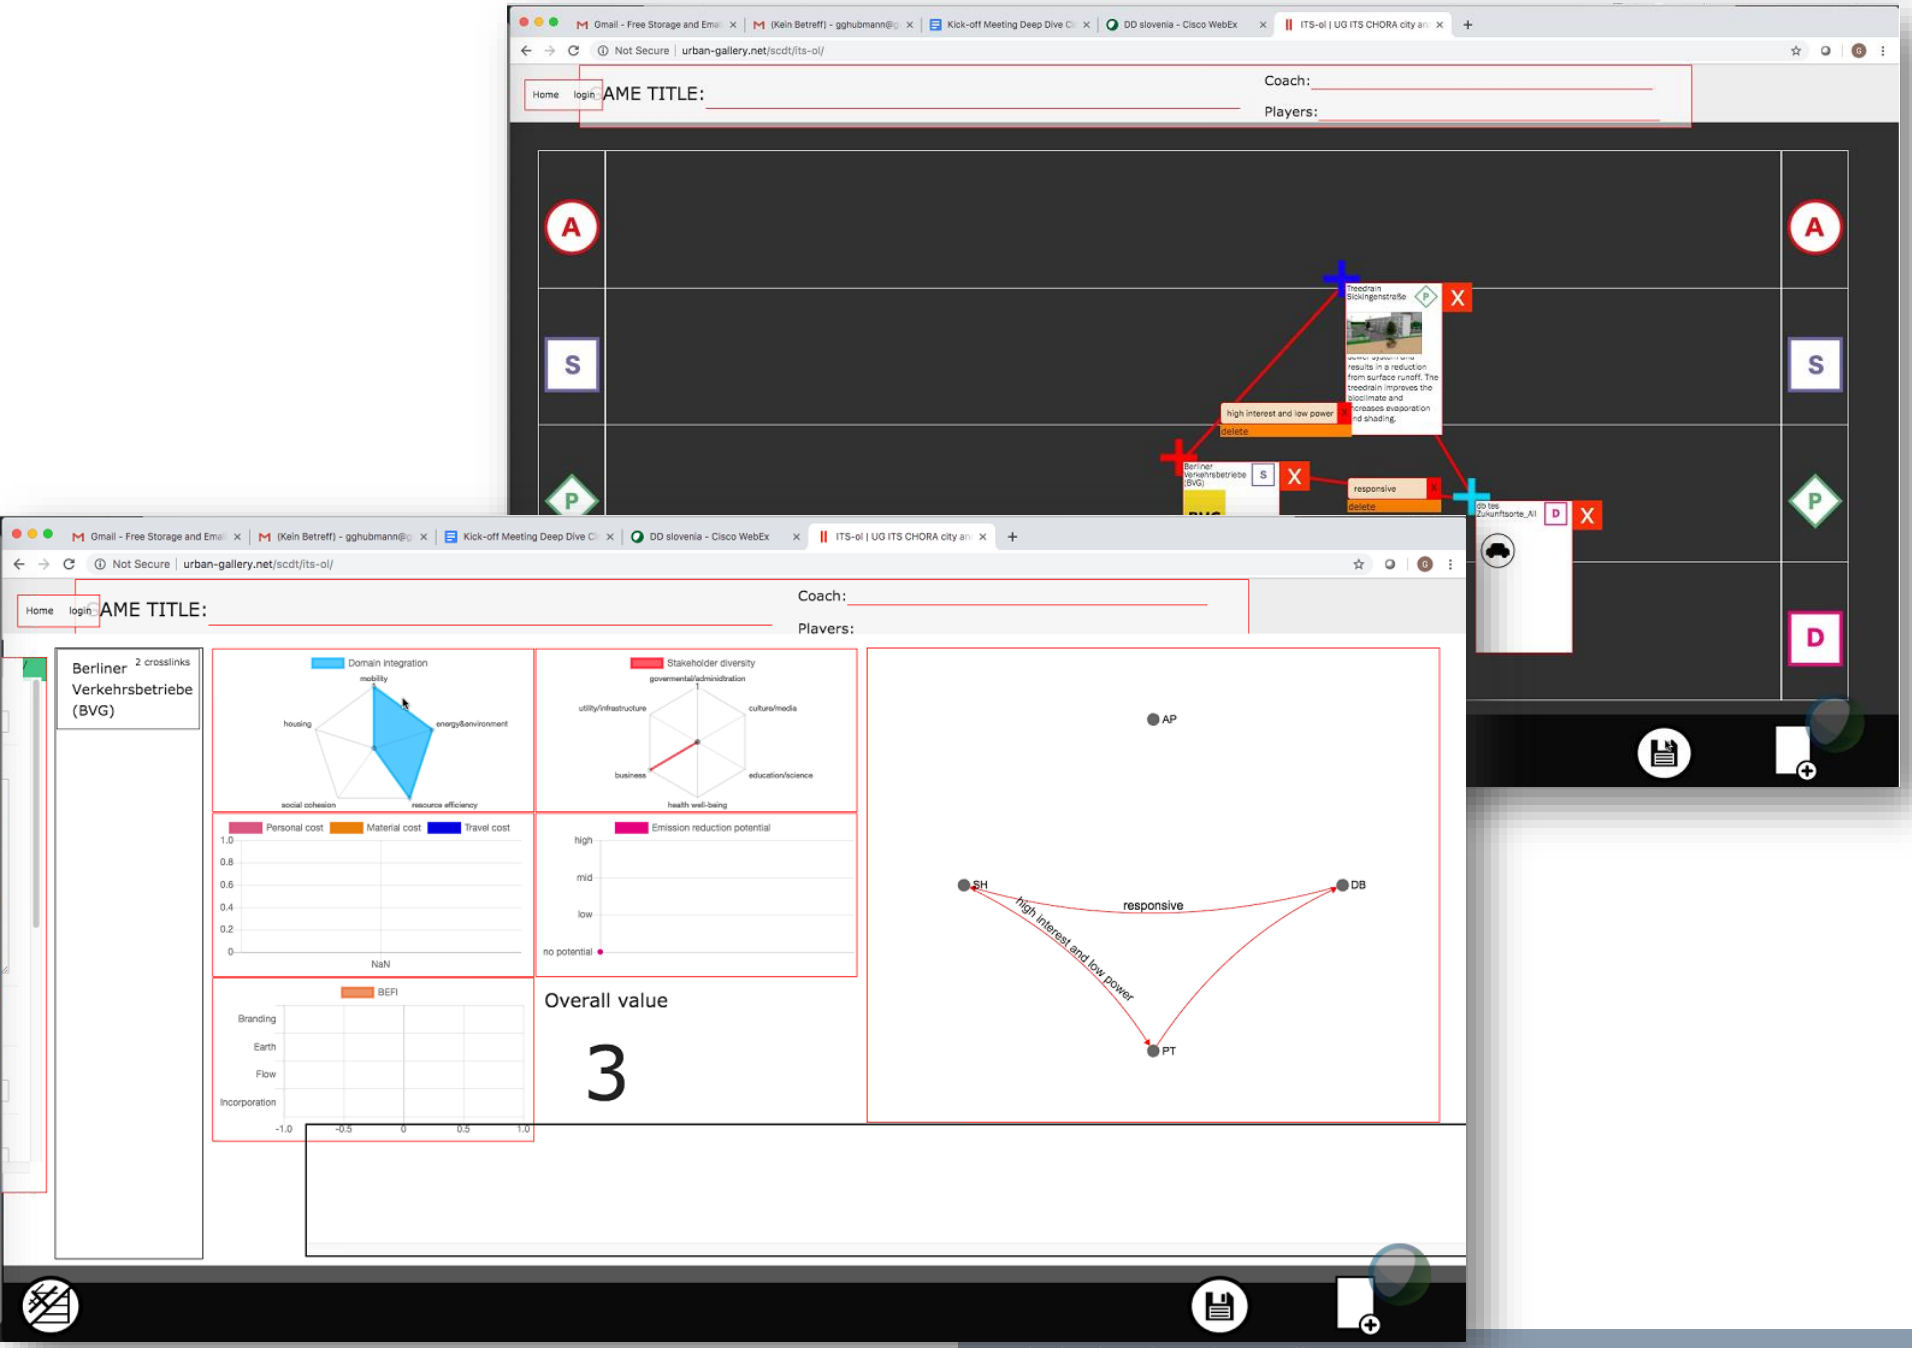

Technical University Berlin

- further development of stakeholder and value chain mapping

© TU Berlin

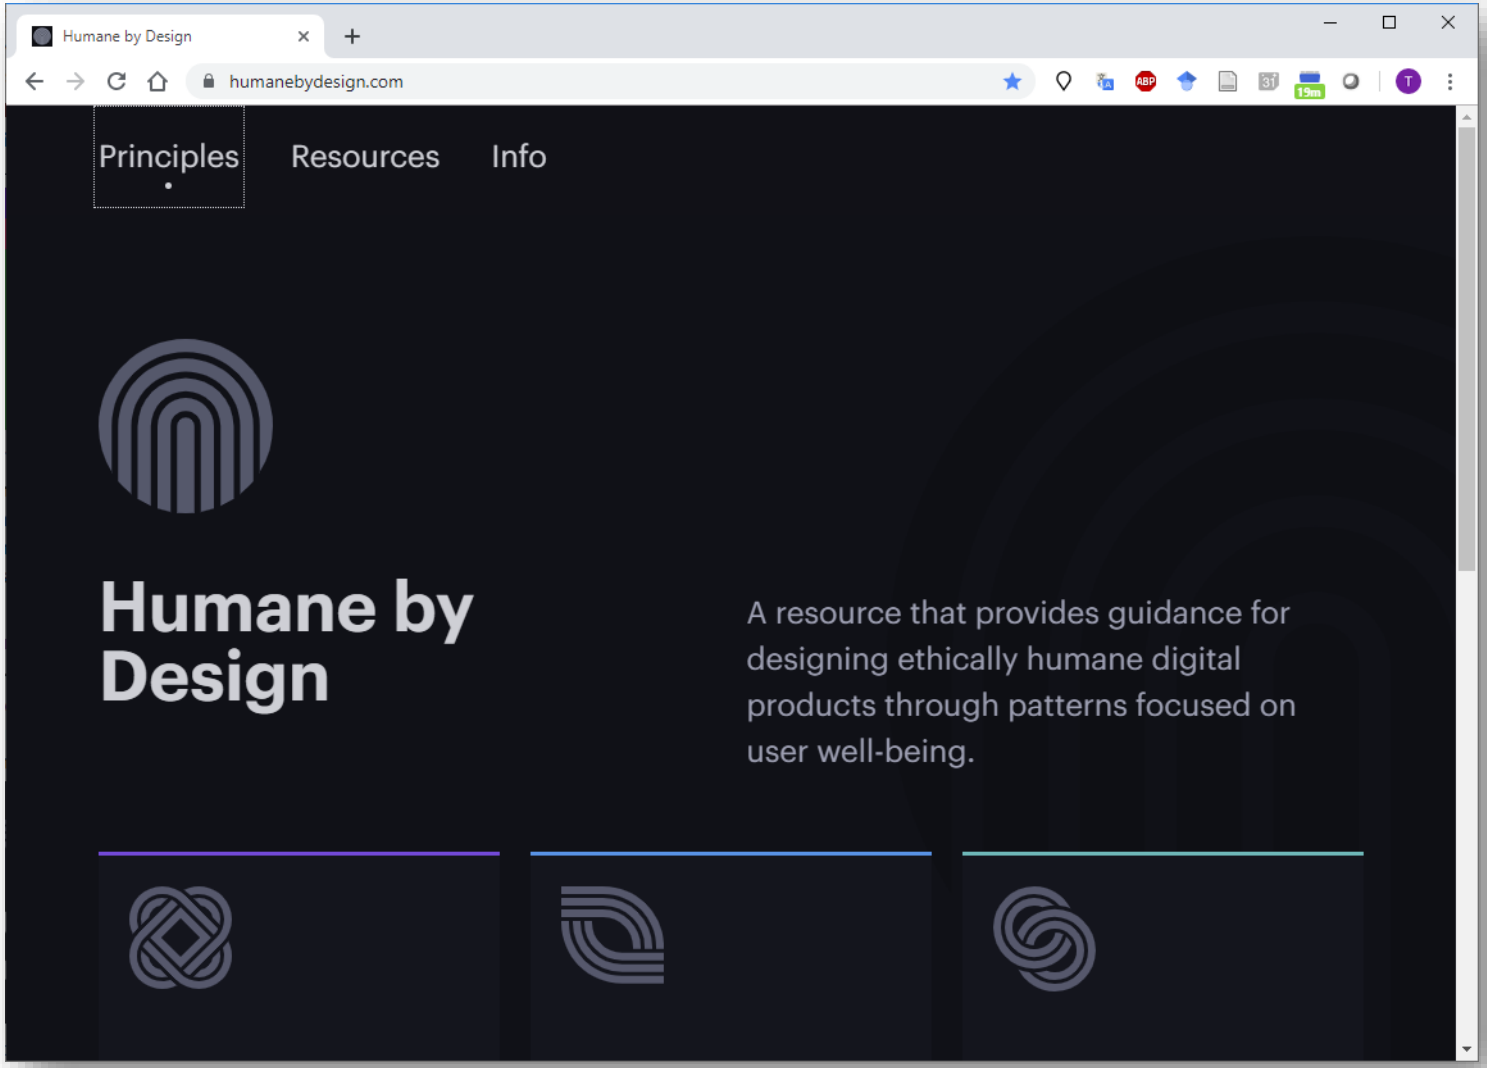

- there is a lot of tools out there
(Elen MacArthur Foundation)
>>> our focus: city officials - administration (municipality level)
>>> apply CE indicators on the city level
>>> introduction of indicators through an intuitive guide

© Ellen MacArthur Foundation

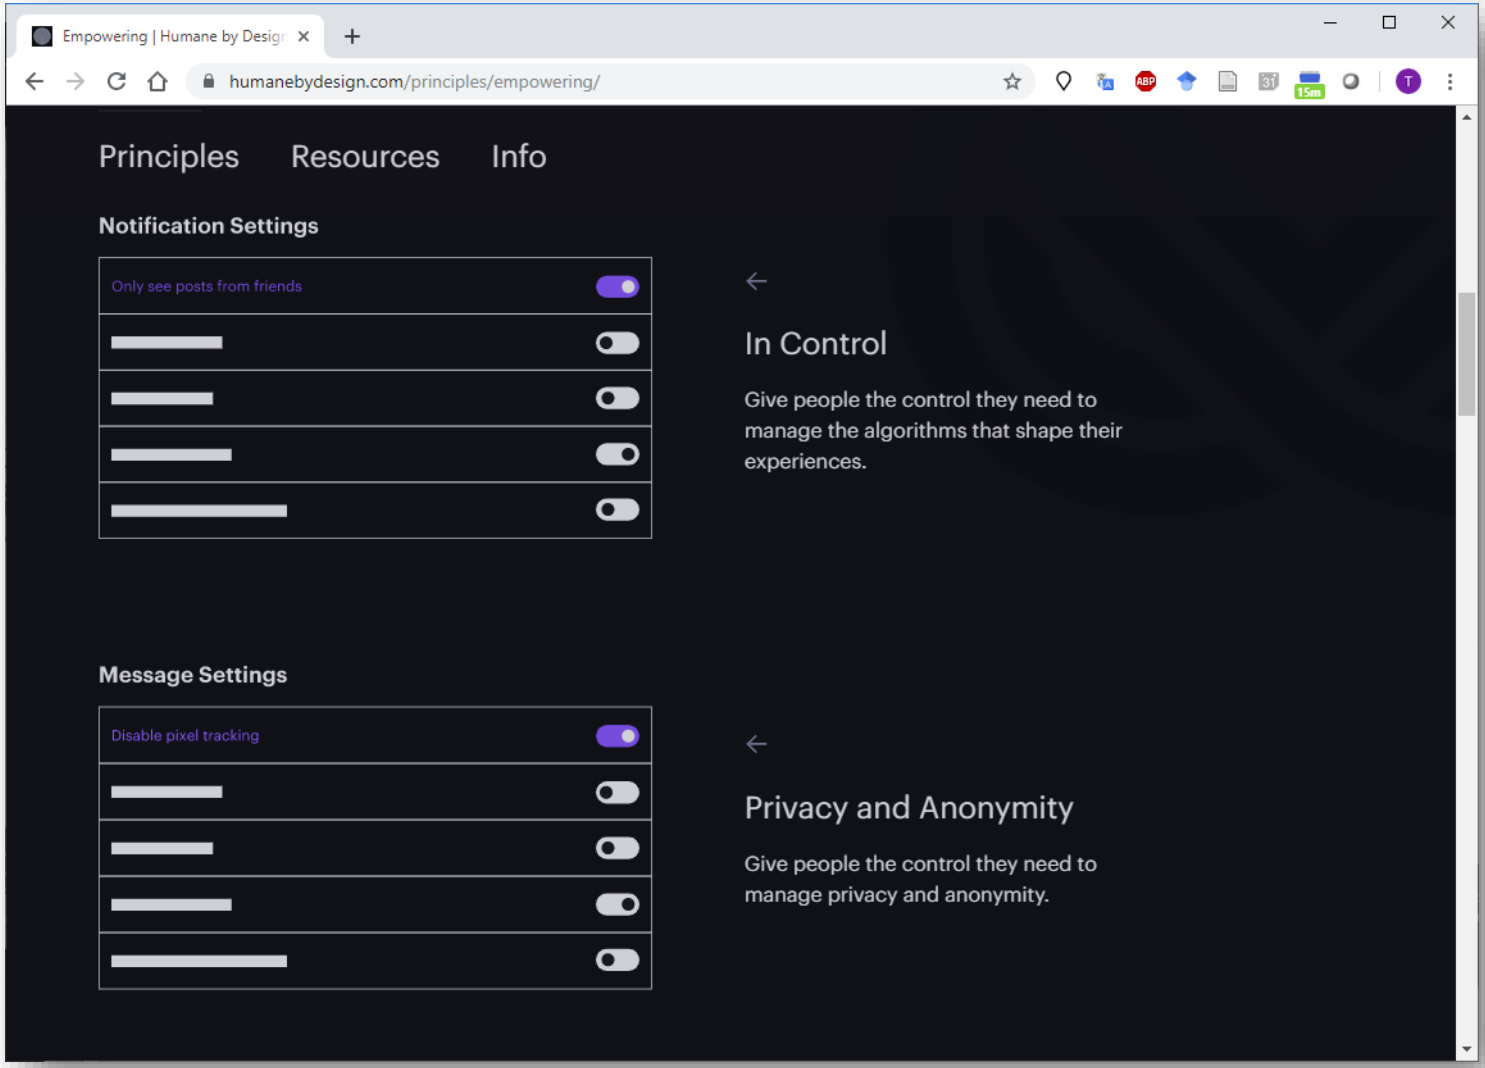

- there is a lot of confusion about the terms
Circular economy vs. Value chain vs. sustainable development vs. Smart specialisation

- to do a encyclopaedic page where the terms are presented, that is readable and understandable, and where all the information is gathered on one page

© Humane By Design

- a simple check for public officials will to tailor-make indicator setup based on available resources
- the indicators will be presented in simple and efficient way
- the needed resources and know-how for indicator implementation will be identified
- possible service providers will be suggested

© Humane By Design

- is this a viable page / framework?
- anyone worked on a similar project?
- any contact we can interview talk to?
- anyone interested in this?
- know any further references?
