

National Institute of Chemistry Slovenia announces

PUBLIC INVITATION

for

Postdoctoral researcher associate (m/f)

Work post: **Laboratory of Chemometrics**

We expect from the candidate:

- PhD degree (doctor degree of medicinal sciences or equivalent work experience in the field of various discipline in biomedical sciences, health protection or technology transfer)
- candidate has to show high developed ability of interpersonal relationships, cooperation and communication
- fluency in English is expected and a candidate has to be interested to learn Slovene and Italian
- candidate should have good ability to solve problems, ability of lateral thinking, business spirit and has to be interested to connect basic results of scientific research into innovative products and services

Work:

Selected candidate will cooperate with various partners of the network. In this way the candidate will receive multidisciplinary training in the field of different technologies, giving rise to higher professional qualification.

Training program will include:

- collective initial training about purposes and aims of program TRANS2CARE (<http://www.trans2care.eu/>);
- training in the field of technologies, that will be used in treatment of metabolic, genetic, neurological, inflammatory, orthopedic and cardiovascular diseases and cancer;
- planning interstate and interdisciplinary mobility with the purpose to establish technology transfer inside and outside of the network;
- additional education in the field of legislation concerning intellectual property, business, management, innovation and technology transfer and therewith associated financial tools to implement research and provide development in the field of biomedicine;
- work will include analysis of large amount of data with the methods of statistics and chemometrics in order to support research concerning membrane proteins- structure and their transport properties.

The candidate is expected to spend 20-50% of his/her working time at the other institutions that are partners of this projects.

Starting date: September 1, 2011 (for 3 years with full-time work)

Work Project: Trans2Care (<http://www.trans2care.eu/>);

Additional informations are available from principle investigator at the National institute of Chemistry Prof. Dr. Marjani Novič, voice 00386-1-4760253, e-mail: Marjana.Novic@ki.si

Applications are expected by June 30, 2011 by e-mail to tanja.svetic@ki.si.

Candidates will be notified in 8 days from the date of decision.
