

NATIONAL INSTITUTE OF CHEMISTRY WE ARE HIRING

GMP production and development expert at CTGCT – Center for the Technologies of Gene and Cell Therapy (m/f)

Job responsibilities:

- Development of and setting up the production system and managing implementation in accordance with Slovenian, European and international legislation (EMA, FDA, ICH, Convention on Pharmaceutical Inspection);
- Preparation and review of GMP documentation;
- Ensuring that all activities are in line with current good practices (cGxP), and data integrity;
- Participation in the preparation of materials and/or preparation of proposals for R&D projects;
- Organisation of the assigned area;
- Preparation and support of controls and inspections;
- Participation in deviation investigations, preparation, support and coordination of corrective and preventive actions and follow-up of implementation;
- Training and coordinating the work of technical staff and transferring expertise to colleagues;
- Preparation of documentation, reports and studies on the work carried out;
- Preparation of technical reports, presentations, articles and other forms of dissemination or popularisation of development and technical work at home and abroad;
- Presentations of prepared materials to colleagues, the Head of Unit and, where appropriate, to external users;

- Communication with external bodies;
- Responsibility for personal and professional development;
- Other work as directed by supervisor, determined in accordance with discussion of objectives and performance indicators.

What we expect:

Expected Qualifications: PhD; life sciences

Alternative qualifications: PhD in pharmaceutical, biotechnology, biological, chemical, microbiological or other relevant life sciences

Work experience: 4 years. Preferably work experience in production, bioprocess development, sterile process development, quality assurance/quality control, or other professional quality experience.

NATIONAL INSTITUTE OF CHEMISTRY WE ARE HIRING

Join us in taking gene and cell therapy technologies from concept to clinic! The National Institute of Chemistry (NIC) invites you to become a part of our team as a **GMP production and development expert** for the Centre for the Technologies of Gene and Cell Therapy (CTGCT).

The CTGCT is a unique project to develop the infrastructure associated with the development of gene and cell therapy technologies, working with international partners from prestigious institutions that are key to the development of therapies for cancer and rare genetic diseases. The project addresses new treatment approaches, promotes international collaboration between researchers and brings together patients, clinicians and researchers. If you are ready to contribute your expertise to cutting-edge biomedical research, foster innovation and improve access to innovative advanced therapies, join us at CTGCT!

Send your application, including a CV and cover letter, by **March 29, 2026**, inclusive, to the email address zaposlitev@ki.si with the subject line: "D22 - CTGCT - GMP production and development expert"

What we offer:

Duration of employment: Fixed term for the duration of the project, until 31.8.2029

Probationary period: 4 months

Working time: 40 hours/week

**More info: 01/4760 236
(dr. Darja Marolt Presen)**
